

How to mzchange logo from server mail

Zimbra

```
sudo -u zimbra -i
```

```
zmcontrol status
```

Images hosted in external server (recommended)

The recommended way to present the logos is to host the images in a external server and present this public and valid URL to the Zimbra commands. In this case, even if you upgrade the Zimbra release, the logos will remain in the external server:

```
zmprov md example.com zimbraSkinLogoURL https://mail.example.com  
zmprov md example.com zimbraSkinLogoLoginBanner  
https://www.example.com/MyLoginBanner.png  
zmprov md example.com zimbraSkinLogoAppBanner  
https://www.example.com/MyAppBanner.png  
zmmailboxdctl restart
```

```
sudo -u zimbra -i zmprov md prohost.com.bd zimbraSkinLogoURL https://mailx.prohost.com.bd  
sudo -u zimbra -i zmprov md mailx.prohost.com.bd zimbraSkinLogoLoginBanner  
https://tbsnews.net/sites/all/themes/sloth/images/TBS\_Icon\_Grey.png  
sudo -u zimbra -i zmprov md prohost.com.bd zimbraSkinLogoLoginBanner  
https://tbsnews.net/sites/all/themes/sloth/images/TBS\_Icon\_Grey.png
```

```
sudo -u zimbra -i zmprov md prohost.com.bd zimbraSkinLogoAppBanner  
https://tbsnews.net/sites/all/themes/sloth/images/TBS\_Icon\_Grey.png
```

```
sudo -u zimbra -i zmmailboxdctl restart
```

zmprov command use in zimbra

[Penguin Technology Linux Training - 16:00 Mail Server](#), [zmprov command](#)

In zimbra mailservr zmprov command can performs all provisioning tasks in Zimbra LDAP including creating accounts, aliases, domains, COS, distribution lists, and calendar resources. This zmprov is very powerful tool for zimbra administrator to perform daily task. Beside using command line interface (CLI), system administrator also can perform the following task from zimbra admin console.

The command syntax is `zmprov [cmd] [argument]`

Create account with password

Syntax:

```
zmprov ca name@domain.com password
```

Example:

```
$ zmprov ca shahzad@example.com india@321
```

Create account in zimbra with Display name

```
$ zmprov ca shahzad@example.com india@321 displayName "Shahzad Alam"
```

Create additional Administration Account in zimbra

Syntax:

```
zmprov ca account_name@domain.com [password here] zimbralsAdminAccount TRUE
```

Example:

```
$ zmprov ca admin1@example.com india@321 zimbralsAdminAccount TRUE
```

Make normal email account to administrator account in zimbra

Syntax:

```
zmprov ma account_name@domain.com zimbralsAdminAccount TRUE
```

Example:

```
$ zmprov ma shahzad@example.com zimbralsAdminAccount TRUE
```

Create Domain in zimbra

```
$ zmprov cd xyz.com
```

List /View all domain in zimbra

```
$ zmprov -l gad  
example.com  
xyz.com
```

List all user account in domain

```
zmprov gaa example.com
```

List all email account in zimbra

```
$zmprov -l gaa
```

List all Administrator account in zimbra

```
$zmprov -l gaaa
```

Change password of any account in zimbra

```
$ zmprov sp shahzad@example.com india@123
```

Change password of administrator account in zimbra

```
$ zmprov sp admin@example.com india@123
```

Delete account in zimbra

```
$ zmprov da shahzad@example.com
```

Note: some time email id can't delete due to corruption from ldap. So we will need to delete account with -l (ldap) option. Use below command to delete account .

```
$ zmprov -l da shahzad@example.com
```
